

The Federal Communications Commission

Dear The Federal Communications Commission,

I oppose the proposed flat tax.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. It would be unfair for me to pay the same as another who uses the cell phone more frequently.

I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Mike Quintos
